

# NLG Tether Choke™, Single Arm

Product Code:  
101368

Max Load:  
20 KG / 44 LBS

## OVERVIEW

The Tether Choke™, Single Arm is a simple and secure solution perfect for large power tools. In combination with our Tether Tape™ the single arm locks the Tether Choke™ in position and prevents the choke slipping and causing accidental engagement if the tool is dropped.

## NLG ID™ Serialised and safe

Simply scan the NLG ID tag with your phone to instantly access certificates, instruction videos and log inspections. (See Specification if included).

## Third-party tested and certified

Independent laboratory load testing certificates and Declarations of Conformity are available on request. Please contact [team@neverletgo.com](mailto:team@neverletgo.com).

DESCRIPTION

The NLG Tether Choke™ with a single securing arm is the solution for your big problem tools – those tools that are big in size and big in weight. The single securing arm combined with the simplicity of the Tether Choke™ only extends its area of use.

Built to last the Tether Choke™, Single Arm is constructed from a high-strength webbing that features contrast stitching for easy visual inspections. A durable V ring allows for quick and secure attachment of a suitable tool lanyard.

Specially developed for users of power tools with triggers, the securing arm allows the Choke™ to be locked in position with the approved Tether Tape and keeps the tool's trigger restriction-free. The versatility of the Tether Choke™ means it is approved to use as an anchor as well.

FEATURES

- Single-securing arm guards against movement across both straight-shafted tools and power tools
- Optimised V Ring design for extreme performance
- Extra high-strength webbing delivers ultimate peace of mind
- Faster visual inspections with heavy-duty contrast stitching
- Clever contrast wear indicators ensure early warning of any structural damage
- Ergonomic and comfortable grip optimised for use on handles
- Designed to be paired with Tether Tape™ as part of the NLG Instant Tether System™

TECHNICAL SPECIFICATION

INSPECTION

In addition to routine checks before each use, all equipment should undergo regular detailed inspections, conducted and recorded by a competent person using the NLG Inspection Checklist. If any part is worn or shows signs of degradation, immediately retire from service. In the event of a drop, quarantine the equipment for a thorough inspection.
