

# NLG Tether Choke™, Twin Arm

Product Code:  
101369

Max Load:  
20 KG / 44 LBS

## OVERVIEW

The Tether Choke™, Twin Arm is a simple and secure solution ideal for large straight-handed tools such as a pry bar. When combined with our Tether Tape™ the twin arms lock the Tether Choke™ in position on the tool and prevent it slipping in case the tool is dropped.

## NLG ID™ Serialised and safe

Simply scan the NLG ID tag with your phone to instantly access certificates, instruction videos and log inspections. (See Specification if included).

## Third-party tested and certified

Independent laboratory load testing certificates and Declarations of Conformity are available on request. Please contact [team@neverletgo.com](mailto:team@neverletgo.com).

DESCRIPTION

Sometimes things just get better – and that’s exactly the case with the NLG Tether Choke™ with two securing arms. Suitable for any tool, the Tether Choke™ can be used on tools with captive handles and even straight-sided tools such as sledgehammers, slogging wrenches etc.  
 Built to last the Tether Choke™, Twin Arm is constructed from a high-strength webbing that features contrast stitching for easy visual inspections. A durable V ring allows for quick and secure attachment of a suitable tool lanyard.  
 Once the two securing arms are locked with NLG’s approved Tether Tape™, the most difficult to tether tools can be secured and the workplace becomes a safer place.

FEATURES

Twin securing arm guards against movement across both straight-shafted tools and tools with long cylindrical handles  
 Optimised V Ring design for extreme performance  
 Extra high-strength webbing delivers ultimate peace of mind  
 Faster visual inspections with heavy-duty contrast stitching  
 Clever contrast wear indicators ensure early warning of any structural damage  
 Ergonomic and comfortable grip optimised for use on handles  
 Designed to be paired with Tether Tape™ as part of the NLG Instant Tether System™

TECHNICAL SPECIFICATION

Max Load: 20 KG / 44 LBS

INSPECTION

In addition to routine checks before each use, all equipment should undergo regular detailed inspections, conducted and recorded by a competent person using the NLG Inspection Checklist. If any part is worn or shows signs of degradation, immediately retire from service. In the event of a drop, quarantine the equipment for a thorough inspection.
