Serialised and safe

Simply scan the NLG ID tag with your phone to instantly access certificates, instruction videos and log inspections. (See Specification if included).

Third-party  
tested and certified

Independent laboratory load testing certificates and Declarations of Conformity are available on request. Please contact [team@neverletgo.com](mailto:team@neverletgo.com).

DESCRIPTION

The Super Heavy Duty Tool Lanyard is a flat webbing lanyard that is specifically designed for use with very heavy tools. The twistlock double-action carabiner is easy to operate even with gloves on and ensures that there can be no accidental release whilst in use. The loop end of this lanyard can be used to loop around the captive handle of a power tool, through a manufactured captive eye, or around a fixed object or beam. This lanyard is made from flat webbing and has no stretch meaning that it is great for use within MEWPs or working platforms as it has no resistance when in use. The long length provides full freedom of movement and allows you to work in a large area without having to disconnect the tool or lanyard.

FEATURES

Automatic Twistlock carabiner for superior performance and security  
 Extra high-strength webbing delivers ultimate peace of mind  
 Heavy-duty wear protector sleeve provides an additional layer of structural protection  
 Faster visual inspections with heavy-duty contrast stitching  
 Clever contrast wear indicators ensure early warning of any structural damage

### INSPECTION

In addition to routine checks before each use, all equipment should undergo regular detailed inspections, conducted and recorded by a competent person using the NLG Inspection Checklist. If any part is worn or shows signs of degradation, immediately retire from service. In the event of a drop, quarantine the equipment for a thorough inspection.
