Third-party tested and certified

Independent laboratory load testing certificates and Declarations of Conformity are available on request. Please contact team@neverletgo.com.

DESCRIPTION

The Linesman Bag is a specialist bag that is designed for industrial climbers who need to keep their tools close, easily accessible and securely tethered. It is the bag of choice for those working in the harshest environments with a unique closure system on all openings to secure bag contents and protect against external elements.

The multi-pocket design of the Linesman Bag (two large and two small pockets) combines an array of load-tested attachment points for tool lanyards (4 external tool holders and 8 rings for attachment) with the pocket's innovative bag closures to prevent the risk of accidental spillage in transit. The pocket's closures can be rolled back once in the work position to allow easy access.

The Linesman Bag is manufactured using a combination of reinforced Cordura style and specially developed Mega Mesh™ to create a tough and rot-proof bag.

The universal Quick Connect™ clips on the rear of the bag allow it to be easily attached to a belt, harness or handrail.

FEATURES

Heavy duty drop prevention closure system ensures tools are contained
 Top rolls neatly out of the way with intelligent Velcro positioning
 Mega Mesh™ provides improved visibility, drainage and ventilation
 8 integrated anchor points for multiple tool lanyard attachment
 4 external tool holders provide a full tool tethering setup
 Constructed from heavy-duty Cordura style which is UV-stabilised, mildew resistant and easy to wipe clean
 Structurally engineered to withstand dynamic impact forces
 Built-in drain vents to keep tool bag ventilated and dry
 Universal fit with Quick Connect™ buckles for easy attachment

TECHNICAL SPECIFICATION

Max Load: 30 KG / 66 LBS, Internal Anchor Point / Daisy Chain Max Load: 5 KG / 11 LBS (each)

INSPECTION

In addition to routine checks before each use, all equipment should undergo regular detailed inspections, conducted and recorded by a competent person using the NLG Inspection Checklist. If any part is worn or shows signs of degradation, immediately retire from service. In the event of a drop, quarantine the equipment for a thorough inspection.
