**NLG ID™**  
Serialised and safe

Simply scan the NLG ID tag with your phone to instantly access certificates, instruction videos and log inspections. (See Specification if included).

Third-party  
tested and certified

Independent laboratory load testing certificates and Declarations of Conformity are available on request. Please contact [team@neverletgo.com](mailto:team@neverletgo.com).

DESCRIPTION

The design of the Tall Tool Bag allows for longer hand tools to be kept safe when working at height. Despite the increased height, there has been a special focus on keeping the dimensions of the tool bag ergonomic and comfortable for the user whilst moving around.

The Tall Tool Bag features one large compartment to give the most flexible storage area, with a Velcro locking lid to keep the contents safe while in transit. There is also an external front pocket with an independent closure. Both closures can be rolled back once in the work position to allow easy access to your tools.

The 4 external tool holders and 6 integrated D Rings for tool lanyard attachment make this an all-in-one tool bag for working at height.

The universal Quick Connect™ clips on the rear of the bag allow it to be easily attached to a belt, harness or handrail.

FEATURES

Heavy duty drop prevention closure system ensures tools are contained  
 Top rolls neatly out of the way with intelligent Velcro positioning  
 Mega Mesh™ provides improved visibility, drainage and ventilation  
 6 integrated anchor points for multiple tool lanyard attachment  
 4 external tool holders provide a full tool tethering setup  
 Constructed from heavy-duty PVC which is UV-stabilised, mildew resistant and easy to wipe clean  
 Structurally engineered to withstand dynamic impact forces  
 Built-in drain vents to keep tool bag ventilated and dry  
 Universal fit with Quick Connect™ buckles for easy attachment"

INSPECTION

In addition to routine checks before each use, all equipment should undergo regular detailed inspections, conducted and recorded by a competent person using the NLG Inspection Checklist. If any part is worn or shows signs of degradation, immediately retire from service. In the event of a drop, quarantine the equipment for a thorough inspection.
