Third-party
tested and certified

Independent laboratory load testing certificates and Declarations of Conformity are available on request. Please contact team@neverletgo.com.

DESCRIPTION

The NLG Utility Bucket is a 30L tool bucket specifically designed for the power and utilities industry, providing a reliable solution for transporting and storing tools when working at height. With its rigid construction, the bucket stands up by itself, making it easy to access tools without the hassle of a collapsing container.

The large opening provides quick and easy access to tools and equipment, whilst the drainage holes in the base prevent water accumulation, keeping contents dry and ready for use.

Load-rated for safe lifting, the Utility Bucket features a sturdy lifting handle allowing it to be hoisted safely to elevated work areas. Internal load-rated D rings provide secure anchor points for tethering tools, ensuring nothing is dropped during transport or while working at height.

Despite its rigid design, the Utility Bucket features a collapsible construction that makes it easy to store when not in use, saving valuable space in vehicles or storage areas. With a 50kg load rating, the NLG Utility Bucket is built to handle the demands of professional use in the toughest work environments.

FEATURES

- Stands up by itself due to rigid design
- Large opening for easy access
- Load-rated lifting handle
- Load-rated external daisy chain loops
- Drainage holes in base
- Internal Load Rated D rings
- Collapsible design makes it easy to store when not in use
- Clear ID Pocket

TECHNICAL SPECIFICATION

Max Load: 50 KG / 110 LBS, Internal Anchor Point / Daisy Chain Max Load: 5 KG / 11 LBS (each)
 Safety Standards: CE / UKCA
 Load Tested and Third-party Certified: Dynamic (2:1 Safety Factor), Static (7:1 Safety Factor)
 NLG ID™ Technology / Scannable Compatible
 Unique Serial Number
 Dimensions: 38cm (H) x 32cm (W) x 32cm (D)

Capacity: 30 L

INSPECTION

In addition to routine checks before each use, all equipment should undergo regular detailed inspections, conducted and recorded by a competent person using the NLG Inspection Checklist. If any part is worn or shows signs of degradation, immediately retire from service. In the event of a drop, quarantine the equipment for a thorough inspection.
