DESCRIPTION	The NLG Reinforced Tablet Case 10.9 is a tether-ready solution engineered to protect your device when working at height or in demanding environments. Tablets are among the most frequently dropped, and most expensive, items on site. This case provides the protection and tethering capability you need to keep your device secure and operational. Constructed from durable yet lightweight materials, the case guards against impacts and abrasions without adding unnecessary bulk. The integrated anchor point allows quick attachment of certified tool lanyards or shoulder straps, essential for compliance when working at height. The innovative loop design minimises snag hazards while ensuring you can charge and operate the tablet without removing it from the case. The moulded screen protector delivers full edge-to-edge defence, while the versatile 360-degree rotating handle provides a comfortable grip in any orientation. An adjustable stand enables hands-free viewing when conditions allow. Compatible with iPad Gen 10 and iPad Gen 11. Always pair with a certified tool lanyard or shoulder strap.	
FEATURES	Durable construction protects the tablet Quick and easy attachment of a tool lanyard or shoulder strap Design allows the table to be charged whilst still in the case Case works with iPad Gen 10 and iPad Gen 11

INSPECTION

In addition to routine checks before each use, all equipment should undergo regular detailed inspections, conducted and recorded by a competent person using the NLG Inspection Checklist. If any part is worn or shows signs of degradation, immediately retire from service. In the event of a drop, quarantine the equipment for a thorough inspection.
