

INSTRUCTIONS

TETHER LOOP™

CODE

120mm → 101380

150mm → 101381

170mm → 101413

MAX LOAD

↳ 3KG / 6.6LBS

NLG ID

Scan the orange tags on compatible NLG products to access detailed product info, certification and installation videos.

TIP

Permanent Fixture Option – Apply a small amount of Locktite threadlocking glue to the thread before finally tightening.

01

Select the correct size of Tether Loop™ that allows enough room for lanyard connection.

02

Pass the Tether Loop™ through a captive hole or handle in the tool. It may also be installed on the narrower mid-section of a tool such as a large spanner/wrench

03

Align the thumb screw and the threaded head and tighten until fully locked.

04

Test the tether point before putting the tool into use.
