

LANYARD TERMINATION INSTRUCTIONS

CHOKE

CATEGORY →TOOL LANYARD MAX LOAD ⇒SEE LABEL

NLG ID

Scan the orange tags on any NLG product to access detailed product info, certification and installation videos.

TIP

Where there is a spring loaded toggle on the choke, this is only to stop the choke from loosening.

01

Pass choke loop through the captive handle or hole, or through the anchor D ring.

02

Pass the other end of the lanyard through the loop.

03

Pull the lanyard through the open loop to create a cinch.

04

Check that it is securely fastened at both ends with a gentle tug on the lanyard.
