

INSTRUCTIONS

10.9" IPAD CASE

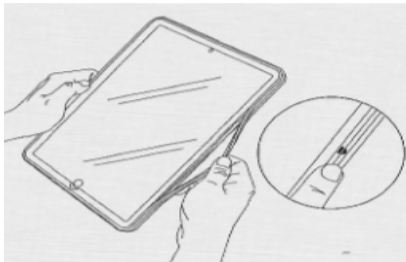

CODE
↳101769

MAX LOAD
↳1KG / 2.2LBS

NOTE

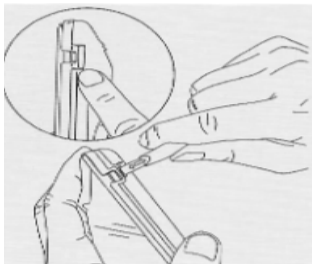

Compatible with certified tool lanyard. Max lanyard length 1.2m.

01

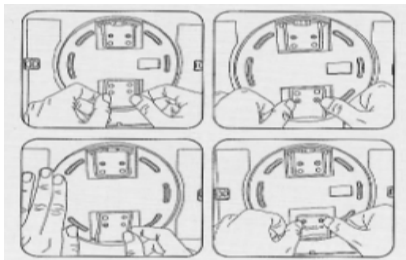

Remove the TPU outer shell by starting from the specific mark located on the right side of the case.

02

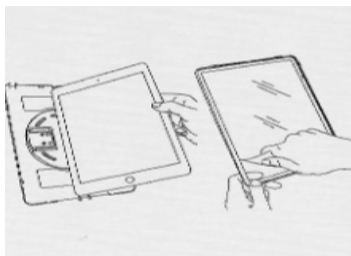

Use the provided blue stick to pry all the tabs around the plastic shell to separate the plastic frame.

03

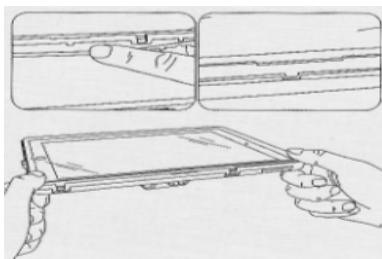

To install the hand strap, align the strap holes with the plastic nails. You can use the two pairs of small holes on either side to adjust the strap size.

04

Peel off the blue protective film from the inside of the plastic frame, which is only there to prevent scratches before use. Then, place your device into the plastic shell.

05

Assemble the plastic shell by snapping all the tabs together, paying close attention to the small tabs located on the inner shell.

Finish the installation by reinstalling the TPU outer shell back onto the plastic shell.
